DETAILED ACTION

Allowable Subject Matter

Claims 1, 3-5 are allowed.

The following is an examiner's statement of reasons for allowance: Regarding claims 1, and 3-5 there is no prior art of record that teaches a driving substrate; pixels on a surface of the driving substrate, each of the pixels including a pixel electrode and a transistor connected to the pixel electrode; signal lines and scanning lines connected to the transistors; an alignment film rubbed in a direction substantially parallel to the signal lines or the scanning lines; a counter substrate adjacent the alignment film; a liquid crystal layer between the driving substrate and the counter substrate; and at least one projection provided in each of the pixels on the pixel electrode at a substantially central position, relative to two opposite boundaries of the corresponding pixel, the two opposite boundaries being parallel to the rubbing direction, the central position being adjacent to a starting position of the rubbing direction and to a boundary not being parallel to the rubbing direction.

Prior art teaches fails to teach a projection provided in each of the pixels on the pixel electrode at a substantially central position, relative to two opposite boundaries of the corresponding pixel, the two opposite boundaries being parallel to the rubbing direction, the central position being adjacent to a starting position of the rubbing direction and to a boundary not being parallel to the rubbing direction for each pixel in the display.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
